

International Workshop

on

Nanostructured Advanced Materials

May 24-26, 2007
Dresden, Germany

organized by

Prof. Dr. Jürgen Eckert
Dr. Bernhard Holzapfel

Scope of the workshop

In the last years, Dresden has developed to a well-known and world-wide acknowledged center for solid state physics and materials research. Especially in the fields of magnetic, superconducting, and metastable materials great advances have been achieved, closely associated with the name of Ludwig Schultz who commemorates his 60th anniversary this year.

In his honour, we have planned this workshop that aims at bringing together long-time experts and the rising generation of scientists to discuss both recent results and new ideas in this interesting field of research.

Venue

The workshop will be held at the Leibniz-Institute for Solid State and Materials Research Dresden e.V. (IFW Dresden) located within a scientifically rich environment with a strong focus on nanostructured advanced materials.

Organization

Prof. Dr. Jürgen Eckert

Preliminary Program:

Thursday, May 24, 2007

12:00

Registration
possibility for lunch

14:00 - 18:30

Session „Magnetic Materials“
(16:00 - 16:30 coffee break)

19:00

Poster Session

Friday, May 25, 2007

9:00 - 12:30

Session „Superconducting Materials“
(10:30 - 11:00 coffee break)
afterwards lunch

14:00 - 18:00

**Colloquium in Honour of the
60th Anniversary of Prof. Dr. Ludwig Schultz**
(15:20 - 15:50 coffee break)

18:30

Reception at the IFW

Saturday, May 26, 2007

9:00 - 12:30

Session „Metastable Materials“
(10:30 - 11:00 coffee break)
afterwards possibility for lunch

14:00

Excursion
