## Scope

This meeting is focused on the role of temperature as a really independent parameter in electrochemistry. Contributions dealing with electrode heating, microwave heating of electrolytes, laser enhanced electrochemistry, sonoelectrochemistry etc. are appreciated. Furthermore, general studies on the temperature dependence of electrochemically relevant quantities are also welcome. It is intended to get the actual state of the art of modern thermoelectrochemistry.

## Time and Location

The colloquium will take place at February 2<sup>nd</sup>, 2007, at Leibniz Institut für Festkörper- und Werkstoffforschung Dresden (IFW), Helmholtzstrasse 20, D-01069 Dresden (Germany), 10:00 till 17:00.
