

The Leibniz Institute for Solid State and Materials Research Dresden – in short IFW Dresden – is a non-university research institute and a member of the Leibniz Association. The IFW employs approximately 600 people and one focus is on the training of young scientists besides enhancing fundamental and applied research development. At the highest international level, the IFW operates modern materials science on a scientific basis and makes the obtained results useful for the economy. The complex and interdisciplinary research work is carried out within the IFW by five scientific institutes, which are supported by a highly developed technical infrastructure. The IFW supports its employees in reconciling work and family life and regularly submits to the berufundfamilie® audit. Further information at: <http://www.ifw-dresden.de>.

The Institute for Solid State Research at the IFW Dresden offers in the field of Surface Dynamics a position as

Post-doctoral Researcher (m/f/d) or Doctoral Researcher (m/f/d)

starting on 1st of March 2019.

We are considering applicants (m/f/d) who have a master degree or diploma in physics, electrical engineering or mechanical engineering and sufficient specialist knowledge in the fields of:

- fluid mechanics, microfluidics
- microacoustics, especially surface acoustic wave (SAW) technology
- radio frequency measurement technology
- simulations based on MATLAB, COMSOL or similar.

We expect good communication skills in written and spoken English. Professional working style as well as capacity for teamwork and personal motivation are required.

The work comprises experimental and theoretical investigations on SAW-based actuators to get deeper understanding of mechanisms and effects governing two-dimensional focusing of particles as well as heating in microfluidic setups.

For further information please contact Dr. Hagen Schmidt (h.schmidt@ifw-dresden.de).

The employment contract can start from 1st March 2019 and will end latest after three years. The salary is based upon the TV-L rules (EG 13; 100% for Postdoctoral Researcher (m/f/d) and 50% for Doctoral Researcher (m/f/d)).

The IFW would like to increase the proportion of women in science. Qualified women are therefore explicitly invited to apply. Severely disabled applicants (m/f/d) are given preferential treatment if they have the same qualifications.

If you are interested in the position, please send your application (in English) including a CV, a motivation letter describing the research career goals, skills and experience, copies of certificates and recommendation letters citing the reference number (DM1001-1/19) not later than 24th of February 2019 as a single pdf file (other formats will not be accepted) exclusively to:
